PROFESSIONAL SUMMARY

Full-stack developer with more than four years of experience building and maintaining complex enterprise applications within a multi-tenant hospitality SaaS platform. Specialized in Angular 21, strict TypeScript, Signals, and reactive frontend architecture, with hands-on experience using Node.js, Hapi, and MongoDB. Able to deliver features end to end, from problem analysis and responsive interfaces to business logic, REST APIs, persistence, localization, automated testing, and production support. Experienced in large monorepos and in solving product and technical problems across more than 20 business modules.

TECHNICAL SKILLS

Frontend: Angular 21, strict TypeScript, Signals, Computed, Effects, zoneless architecture, RxJS, Angular Material, Svelte, Vite, HTML5, CSS3, SCSS, responsive design

Backend: Node.js, Hapi, REST APIs, Joi validation, use-case-based architecture, scheduled jobs

Data: MongoDB, queries and aggregations, previous experience with Sequelize and relational databases

Testing: Playwright, Vitest, unit, integration, and end-to-end testing

Tools and integrations: Git, Azure DevOps, Docker, Docker Compose, Auth0, Twilio, WhatsApp channels, i18n

Additional strengths: debugging, legacy-system maintenance, performance optimization, migrations, code review, incident resolution

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Norelian LLC

November 2021 – October 2026 | Montevideo, Uruguay

- Developed and maintained GuestHub, a multi-tenant SaaS platform for hotel operations covering reservations, requests, tasks, check-in, communications, reviews, restaurants, reporting, and property administration.
- Delivered complex user interfaces with Angular, TypeScript, and Svelte, including forms, validation, filters, search tools, dashboards, configuration workflows, and responsive experiences.
- Built and evolved REST APIs with Node.js and Hapi using use cases, actions, validation, and MongoDB data-access layers.
- Contributed to more than 20 product modules and maintained shared functionality across administration portals, guest-facing applications, and backend services.
- Built a contactless check-in service with endpoints for listing, retrieving, updating, commenting on, and completing check-in processes, including Docker and environment configuration.
- Implemented operational dashboards, metrics, and Excel/CSV exports, and optimized backend queries and data-retrieval processes.
- Developed and fixed chat workflows, voice dictation, delivery states, notifications, and communication-channel features.
- Worked with authentication and communication integrations, including Auth0, Twilio, and WhatsApp channels.
- Added unit and end-to-end regression coverage with Vitest and Playwright for critical user flows.
- Implemented Spanish and English localization and solved UI, behavior, and mobile compatibility issues.
- Contributed to application and service migrations and maintained Dockerfiles and Docker Compose configurations for multiple environments.
- Collaborated through Git and Azure DevOps using feature branches, pull requests, conflict resolution, and frequent releases.

SELECTED CONTRIBUTIONS AT NORELIAN

Guest application and guest communications

- Implemented chat experiences, delivery states, voice dictation, promotions, terms and conditions, and guest-request workflows.
- Protected critical behavior with automated end-to-end and regression tests.

Digital and contactless check-in

- Built frontend and backend features for check-in processes, statuses, documents, companions, comments, and validation.
- Adapted workflows for mobile devices and different property configurations.

Dashboards and reporting

- Developed APIs and UI components for operational metrics and request analytics.
- Implemented custom Excel and CSV exports and improved backend query performance.

Restaurants, menus, and promotions

- Developed administration tools for outlets, menus, content, schedules, images, and promotions.

- Implemented previews, localization, and responsive experiences for administrators and guests.

EDUCATION

Technical High School Diploma in Information Technology / Computer Systems — UTU Tecnológico

2016 – 2018

CERTIFICATIONS

- JavaScript Web Development

LANGUAGES

- Spanish: Native
- English: B2 — Upper intermediate
